Allowable Subject Matter

1. This is in response to the amendment filed on 02/13/08.
2. Claims 1-29 are allowed.
3. The following is a statement of reasons for the indication of allowable subject matter:

Upon further consideration and comparison with prior art of record (closest reference, Ahn – US 6,671,339), applicant's argument in the REMARKS filed 02/13/08 is agreed to. Particularly, the present invention relates to method and apparatus for selection between a standard automatic switching mode and a soft automatic switching mode based on the rate of transitions of a lock signal. Prior art of record teaches the known method for selection within a standard automatic switching mode. That is, in a standard automatic switching mode, the equalizer switches between an initialization mode (i.e. blind) and a decision directed mode on the basis of the equalizer's convergence. Prior art of record, taken individually or collectively, fails to suggest a motivation for incorporating in an apparatus and method, as claimed, including subject matter "selection one of a standard automatic switching mode and a soft automatic switching mode in a decision feedback equalizer" and "wherein said selection is based on monitoring of the rate of transitions of said lock signal" in independent claim 12 (claims 13-20 depend therefrom); and similarly in independent claims 1, 21-24, 26-28 (claims 25, 29 depend from claims 24, 28, respectively). Thus, claims 1-29 are found to be novel and unobvious over prior art of record.
